27 ft
RECORDED RELIEF

82 ft
FWC SITE DEPTH

440-FOOT FREIGHTER
ORIGINAL VESSEL

WHAT YOU'LL SEE

We call her the Upside-Down Canoe. The stripped freighter is inverted, with the long, curved underside of the hull facing up. Look for that broad outline, not a bridge or open deck.

DEPTH & CONDITIONS

FWC records 82 ft at deployment and 27 ft of relief. These are historic records, not a current survey of the remaining hull. Current and visibility change; the crew confirms the day's plan.

FROM SHIP TO REEF

After the freighter grounded off Palm Beach, salvage removed deck structures before the hull was deployed as an artificial reef on August 22, 1968.

MORE LIFE TO LOOK FOR

Look along the exterior for snappers, grunts and a passing grouper. Jacks may sweep through the water above. Give marine life room and keep clear of the wreck.
